

Class 2 Autumn 1 Me and My Family

Over this half term we shall be learning about 'Me and My Family'.

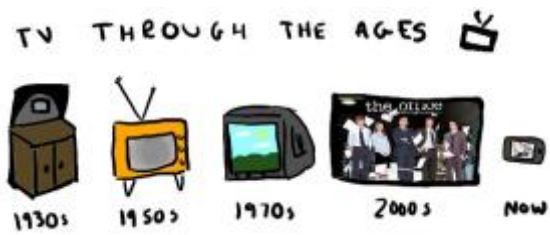

Our main subject focus for this half term is: History.

Our key learning skill is: Resilience.

History

We shall be learning about changes within living memory by finding out about our own family by asking questions to our parents and grandparents. We shall be looking at how daily life has changed since our parents and grandparents were younger.

We shall also be developing our understanding of how many of the changes of our daily life, within living memory, are due to changes and advances in technology.

Science

We shall be learning about animals, including humans. This will include how animals, including humans have offspring that grow into adults, finding out about the basic needs for survival and understanding that exercise, healthy eating and hygiene are important for growth.

We shall be working scientifically to investigate hand washing and exercising, as well as designing a healthy meal.

Computing

The children will learn to use technology safely and respectfully and understand that there are rules to be followed when using ICT, such as keeping personal information private and identify where to go for help and support if they have concerns about others online.

Music

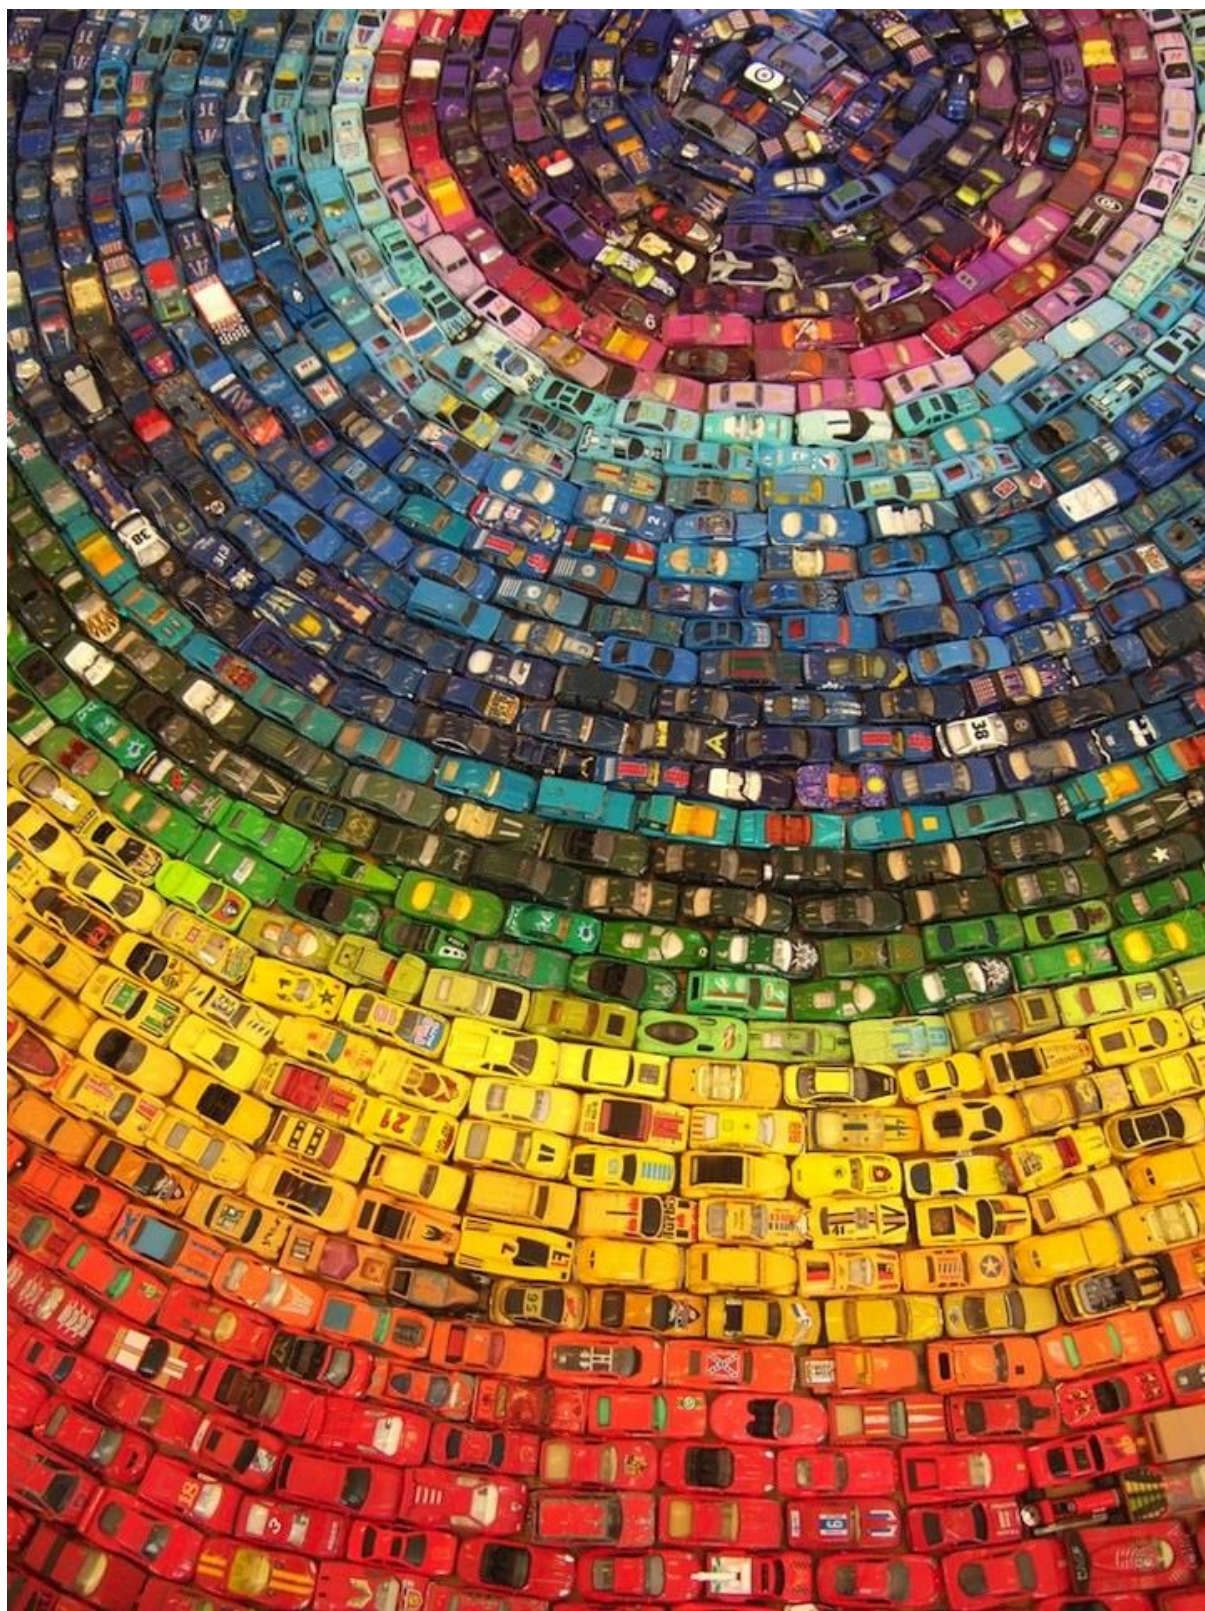

We shall be listening to music from when our parents and grandparents were younger and responding with our likes and dislikes.

We shall also be learning to sing some harvest songs.

Art

The children will be learning to mix primary colours to make secondary colours and to apply different colours to paper, maintaining their separateness.

They will be gaining greater control and effective manipulation skills as they apply paint to paper.

Design and Technology

We shall be making sandwiches to share with our grandparents. We shall also design and make a lunch box to bring the sandwiches home to have tea with our grandparents.

P.E.

The children will learn a variety of team games to develop spatial awareness, moving in different ways and along different pathways, dodging and changing direction.

R.E.

In R.E. we shall be thinking about why and how we celebrate Harvest Festival. We shall also be looking at how Harvest Festival is celebrated around the world.

PSHE - Relationships

We shall be learning that respect is two-way and that you should treat others as you expect to be treated.

We shall discuss who cares for us and whom we can go to for help if we need it.

Learning Skills - Resilience

We shall focus on the importance of learning from your mistakes and being able to bounce back from setbacks. We shall set goals and develop our self-confidence, believing that we can do it.

Homework

Children always have reading as part of their homework and are expected to read at home regularly. In mathematics the children need to practise the number bonds to and within 10, initially and then use these to calculate number bonds to and within 20; as well as practising their 2's, 5's and 10 times tables. Spellings are uploaded on to Teams each week for the children to learn.
